## EXPERIENCE

### Mid-Level UX/UI Designer

#### Danske Bank

📅 April 2021 – Ongoing 📍 2100 Copenhagen

I joined Advice 1 in the Buying & Owning Real Estate tribe at the very beginning of a new project to improve the data gathering process before a bank meeting for both the customer and the advisor. The product is highly anticipated by the leadership. I have been involved in many varying tasks, such as...

- Initiated the process mapping of the meeting journey and the teams and tools within it.
- Aligning business goals, user needs, and squad workload in designs.
- Due to squad changes, I took on the role as a mini BA to lift the work.
- Testing with advisors and customers and planning the organisational implementation.

### UX/UI Design internships

#### Vimento, Nordium, Ticketbutler

📅 September 2020 – April 2021 📍 Denmark

I proactively sought out multiple design internships to establish myself in the industry, and learn the ropes of using my skills professionally, not just academically. My tasks included...

- Freshened up design identity and information architecture of a ticketing platform while fixing smaller UX issues at Ticketbutler.
- Created a design system and website mock-up for a health professional booking and profile solution at Nordium.
- Designed and developed a website and system mock-ups for a telecommunication data provider, Vimento.

## EDUCATION

### B.Sc & M.Sc in Medialogy

#### Aalborg University

📅 August 2015 – July 2020

Medialogy is a product development study with a strong focus on novel technologies, implementation, and testing. I had a strong focus on design and evaluation, making great use of data to inform design decisions, but the cross-disciplinary nature of the study also gives me an edge in communicating across fields and considering limitations outside my field.

### Study abroad

#### Auckland University of Technology

📅 June 2019 – November 2019

I spend a semester of my master studies in New Zealand with a curriculum made completely on my terms with a focus on interaction design. I got a valuable insight into my skills, while meeting great friends and colleagues and getting an unforgettable experience.

## PORTFOLIO

I encourage you to go to my portfolio to see a selection of projects I have worked on. You can find it at [www.rasmusskammelsen.dk](http://www.rasmusskammelsen.dk).

## MOST PROUD OF

### Taking the leap

Moving to seek opportunities in both Auckland and Copenhagen.

### Opportunities & Growth

Seeking challenges and expanding my comfort zone at Danske Bank.

### Running the mile

Despite weight and knee problems I have run two half-marathons.

## STRENGTHS

Hard-working & Reliable Teamworker

Curious & Questioning Adaptive

Cross-disciplinary Knowledge

UX & Interaction Research Agile

Usability Testing Wireframing

Rapid Prototyping Web Development

... and more!

Sketch Figma Adobe XD Zeplin

InVision Jira & Confluence Adobe CS

... and willing to learn!
